

HRMS Gap Analysis: ISARVA vs Karnataka HRMS 2.0

Payroll & Attendance Modules — Deep Comparison

Prepared for: ISARVA HRMS (Payroll & Attendance)

Benchmark: Karnataka State Government HRMS 2.0 (hrms.karnataka.gov.in / HRMS2 ESS)

Version: 1.0 | **Date:** 25 June 2026

This document compares ISARVA HRMS (Payroll and Attendance modules) against Karnataka State Government HRMS 2.0. It is written in plain language so that HR managers, payroll administrators, and business stakeholders can understand what ISARVA already does well, where gaps exist, and what would need to be built.

Status Legend

Status	Meaning
FULL	Feature is available and functional in ISARVA
PARTIAL	Feature exists but is incomplete or simplified
GAP	Feature is not available in ISARVA
N/A	Not applicable — different target market

Summary Scorecard

Status	Count
Full / Available	28
Partial	28
Gap (Not Available)	25
Not Applicable	1

Module 1: Executive Summary

Karnataka HRMS 2.0 is a state-government platform built for 6+ lakh government employees, aided institutions, and university staff. It is designed around government pay rules (pay scales, GPF, NPS, DA), DDO-led salary processing, and deep integration with 45+ departments.

ISARVA HRMS (Payroll + Attendance) is a private-sector, multi-tenant SaaS platform focused on CTC-based salary, EPF/ESI compliance, monthly payroll wizard, and attendance-to-payroll integration for companies.

This is not a like-for-like comparison of two identical products. Karnataka HRMS 2.0 serves government HR lifecycle; ISARVA serves corporate payroll operations. Many government-only features are intentionally absent. Where both overlap (payroll, leave, attendance, ESS), this document highlights what ISARVA already does well and what would need to be built to match Karnataka HRMS 2.0 depth.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Overall platform maturity	20+ years evolution (HRMS 1.0 since 2005); HRMS 2.0 with Kellton; 200+ APIs; 6 lakh users	Modern Laravel 12 multi-app architecture; multi-tenant; Payroll + Attendance + Hub SSO	PARTIAL	ISARVA has modern tech stack but far fewer government integrations and smaller proven scale at state level.
Target user base	Government, aided schools, boards, universities — KGID-based identity	Private companies, SMEs, multi-location corporates — company code + email login	N/A	Different markets by design.

Recommendations

Feature	Recommendation
Overall platform maturity	Position ISARVA for private sector; do not try to replicate full govt HRMS without dedicated govt product line.
Target user base	No action unless entering government sector.

Module 2: Authentication, Access & Security

Karnataka HRMS uses KGID (employee insurance ID) as the primary key, with separate login portals for Government, Aided, and Boards/Universities. The new ESS portal (hrmssess.karnataka.gov.in) uses OTP on registered mobile. DDOs (Drawing and Disbursing Officers) register employees — no self-registration.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Employee login (KGID / Employee Code)	KGID number + password on main portal; KGID + OTP on ESS mobile/web	Company code + email/employee ID + password via Workspace Hub; JWT SSO to Payroll/Attendance	PARTIAL	No KGID concept; no OTP-only ESS login; corporate SSO model instead.
Three-tier login categories (Govt / Aided / Boards)	Separate login tabs and workflows per employee category	Single tenant type per company; no aided-institution or university category split	GAP	No equivalent employee-category portals.
DDO (salary disbursing officer) role	21,000+ DDOs process monthly salary accounts for their establishment	Payroll admin / HR admin with role-based permissions; no DDO establishment hierarchy	PARTIAL	No DDO code, establishment section, or govt salary bill workflow.
Self-registration	Not allowed — DDO registers employee and sends initial password to mobile	Admin creates users; optional Google OAuth; employee cannot self-register	FULL	Aligned — admin-controlled registration.
Password management	Change password with DDO code + role selection; ESS uses OTP	Forgot password, profile password change, cross-app password sync with Attendance	FULL	Corporate password flows are in place.
Aadhaar e-KYC integration	Kartavya-KAAMS attendance app integrates Aadhaar e-KYC for identity verification	Aadhaar number stored as employee personal field only — no e-KYC verification	GAP	No Aadhaar-based identity verification at login or attendance.
Multi-tenant / company isolation	Department-level segregation within single govt system	Full multi-tenant: central registry + per-tenant database shards	FULL	ISARVA exceeds Karnataka model for SaaS multi-company hosting.

Recommendations

Feature	Recommendation
Employee login (KGID / Employee Code)	Add optional OTP login for employee self-service if customers request it.
Three-tier login categories (Govt / Aided / Boards)	Only needed for government deployments.
DDO (salary disbursing officer) role	Map 'Payroll Admin' as functional equivalent for private sector.
Aadhaar e-KYC integration	Integrate Aadhaar e-KYC API if attendance fraud prevention is a priority.
Multi-tenant / company isolation	Strength to highlight for private sector clients.

Module 3: Employee Master Data & Service Book

Karnataka HRMS maintains an Electronic Service Book (e-SR) — a complete career record including every posting, promotion, transfer, training, and suspension. This is the heart of government HR. ISARVA maintains employee master data suitable for payroll but not a lifelong government service register.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Electronic Service Book (e-SR)	Full career history: postings, promotions, transfers, training, suspensions — viewable by employee via ESS	Employee profile with personal, bank, documents, salary history; increment records; exit details	GAP	No service book with posting history, cadre details, or govt order linkage.
KGID / Government ID linkage	KGID links employee to insurance, ESS login, and service records	Employee ID, UAN (EPF), PAN, Aadhaar fields on employee profile	PARTIAL	Private-sector IDs present; no government KGID or PRAN lifecycle management.
Pay Scale & Basic Pay (Government)	Pay scale, basic pay, DA%, HRA%, grade pay — revised per pay commission	CTC-based monthly/annual salary with configurable earning components (Basic, HRA, etc.)	PARTIAL	No pay commission matrix, pay level, or automatic DA revision per govt notification.
Cadre management	Cadre, category, class of post — drives promotion and transfer eligibility	Department, designation, location, employee status — no cadre hierarchy	GAP	No cadre/category/class-of-post master or rules engine.
Employee documents	Transfer orders, posting orders accessible via ESS	Document types, file upload on employee profile, resignation letter PDF	PARTIAL	Document storage exists but no govt order workflow or transfer order generation.
Suspension management	Suspension details with subsistence allowance calculation in salary	Employee status (active/left); held salary module; no subsistence allowance rules	GAP	No suspension workflow or subsistence pay calculation.
Profile update by employee	Limited self-update via ESS; major changes via DDO	Profile view in Attendance; data change request (DPDP compliance) sent to Payroll admin	PARTIAL	DPDP data change request exists — good for private sector; not full ESS profile edit.

Recommendations

Feature	Recommendation
Electronic Service Book (e-SR)	Build 'Employee Timeline' module if long-tenure career tracking is needed.
KGID / Government ID linkage	Add PRAN/NPS fields if serving post-2004 govt-style pension clients.
Pay Scale & Basic Pay (Government)	For govt clients: build pay matrix module. For private: current CTC model is correct.
Cadre management	Government-sector feature only.
Employee documents	Extend document module with order templates if needed.
Suspension management	Add only if serving government or PSU clients.
Profile update by employee	Expand self-service profile fields (contact, emergency, bank) with approval workflow.

Module 4: Recruitment, Transfer & Promotion

Karnataka HRMS 2.0 (Kellton scope) includes recruitment, cadre management, transfers, and promotion as first-class modules with API integration across 45+ departments. ISARVA handles increments and exit but not full recruitment or transfer lifecycle.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Recruitment module	End-to-end recruitment integrated with HRMS 2.0 (Kellton project scope)	Not in Payroll or Attendance; no job posting, application, or selection workflow	GAP	No recruitment / ATS module.
Transfer management	Transfer orders, posting changes, inter-department transfers; viewable on ESS	Location and department can be edited on employee; no transfer order workflow	GAP	No transfer request, approval chain, relieving/joining, or order document.
Promotion management	Promotion history in service book; linked to pay scale revision	Increment & Promotion module (IncrementController) — salary revision with history and revert	PARTIAL	Salary increment exists; no designation promotion workflow or pay scale upgrade.
Annual Performance Appraisal (APR)	Annual performance management module (Kellton HRMS 2.0 scope)	Not available in Payroll or Attendance	GAP	No performance review, rating, or APR-linked increment.

Recommendations

Feature	Recommendation
Recruitment module	Separate product module or integrate with third-party ATS.
Transfer management	Build transfer workflow if enterprise clients need internal mobility tracking.
Promotion management	Link increment module to designation change and approval chain.
Annual Performance Appraisal (APR)	Separate PMS module; optional link to increment.

Module 5: Payroll Processing & Salary Disbursement

Both systems process monthly salary, but the models differ fundamentally. Karnataka uses government pay components (Basic, DA, HRA, allowances, GPF deduction). ISARVA uses CTC-based components prorated by attendance days.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Monthly salary processing	DDO submits salary bill monthly; processed centrally; 6 lakh+ accounts	5-step payroll wizard: select month → attendance → salary review → compare → finalize	FULL	Core monthly payroll exists with lock/finalize.
Attendance-based proration	Present days / LOP integrated with leave and attendance systems	worked_days / total_working_days factor applied to all earnings and deductions	FULL	Strong integration — attendance locked in Attendance app, consumed by Payroll.
Dearness Allowance (DA) auto-revision	DA revised by government notification; applied across all employees automatically	DA can be a salary component but no govt notification-driven mass revision	PARTIAL	No DA rate master linked to govt gazette notifications.
Salary slip (payslip)	PDF download via portal or ESS app; includes Basic, DA, HRA, GPF, GIS, PT, recoveries	PDF payslip generation, email, bulk send; employee views via Attendance portal API	FULL	Payslip delivery is implemented.
Annual salary statement	Full-year summary for income tax filing — available on ESS	Monthly analytics and year comparison reports; no dedicated Form 16 / annual tax statement	PARTIAL	No employee-facing annual tax summary document.
Bank salary transfer file	Integrated with treasury / government banking systems	Bank transfer Excel, CSV, ICICI XLSX formats with NEFT/RTGS/IMPS types	FULL	Private-sector bank file export is strong.
Multi-location payroll	Department and establishment level processing	Per-location or global payroll run with location_id on payout month status	FULL	Multi-location payroll supported.
Held salary / early salary	Recoveries and advance adjustments in salary bill	Held salary module, salary advances with auto-deduction at finalize, early salary flag	FULL	Advance and hold mechanisms exist.
OT, incentives, holiday payout	Allowances processed as part of govt salary components	Dedicated OT/Incentive module with separate finalize flags; holiday work payout	FULL	OT and incentives well covered for private sector.
Full & Final Settlement (FFS) on exit	Retirement benefits and final settlement via pension/GPF modules	Exit employee workflow (Pending → Approved → Completed); FFS calculation	PARTIAL	Exit exists; no gratuity/pension settlement automation.

Recommendations

Feature	Recommendation
Monthly salary processing	None for private sector.
Attendance-based proration	Highlight as competitive strength.
Dearness Allowance (DA) auto-revision	Add bulk component revision tool for DA/rate changes.
Salary slip (payslip)	Add annual salary statement (see Tax module).
Annual salary statement	Generate annual earnings/deductions PDF for IT filing.
Bank salary transfer file	Add more bank format templates as needed.
Full & Final Settlement (FFS) on exit	Add gratuity calculation on exit for private sector compliance.

Module 6: Tax & Statutory Compliance — Deep Analysis

This is the most important area of difference. Karnataka HRMS 2.0 follows government statutory rules (GPF, NPS, GIS, KGID, DA-linked PT). ISARVA follows private-sector Indian payroll compliance (EPF, ESI, simplified PT, optional TDS slabs in settings).

Plain-language summary: ISARVA is built for companies under the Companies Act / Factories Act with EPF and ESI. Karnataka HRMS is built for government employees under GPF/NPS rules. They share the word 'payroll' but use different tax and deduction engines.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
EPF (Employees Provident Fund) — Private Sector	Not applicable — government uses GPF instead of EPF	Full EPF engine: 12% employee share, optional 24% if employer share deducted from CTC, wage cap ₹15,000 or full wages, manual override, UAN on employee, ECR Excel export	FULL	ISARVA is strong for private-sector EPF — Karnataka govt does not use this.
GPF (General Provident Fund) — Government	GPF account with balance, passbook, loan status, installment deduction in salary	Not available — no GPF account, passbook, or GPF loan management	GAP	Government provident fund entirely absent.
NPS / PRAN (National Pension System)	NPS account details for post-2004 employees; PRAN number on payslip	Not available — no PRAN field, NPS contribution calculation, or Tier-1/Tier-2 tracking	GAP	No NPS module for government-style pension.
GIS (Group Insurance Scheme)	GIS installment and coverage details on payslip and ESS	Not available	GAP	No group insurance scheme deduction or policy tracking.
KGID (Karnataka Govt Insurance Dept)	KGID policy details linked to employee identity and salary deductions	Not available	GAP	State-specific insurance scheme not supported.
ESI (Employees State Insurance)	Limited applicability in govt HRMS	Auto-calculated: 0.75% employee contribution when gross ≤ ₹21,000; ESI Excel export	FULL	Private-sector ESI is implemented.
Professional Tax (PT) — Karnataka Slabs	Karnataka govt PT deducted per state rules on govt salary (shown on payslip)	Simplified rule: ₹200/month if gross ≥ ₹25,000, else ₹0 — single flat threshold	PARTIAL	Does NOT implement full Karnataka PT slab structure (₹0–₹200 tiered by salary bands, half-yearly filing nuances, special category exemptions).
TDS (Tax Deducted at Source / Income Tax)	TDS deducted monthly; annual salary statement for IT return filing	TDS slab configuration UI exists in salary settings; TDS shown in analytics/comparison reports — BUT TDS is NOT auto-calculated in monthly payroll engine (recalculateEmployeePayroll only runs EPF, ESI, PT)	PARTIAL	TDS settings exist on paper but are not wired into live monthly salary calculation. No Form 16, Form 16A, or Form 24Q generation.
Form 16 / Form 24Q (Income Tax Returns)	Annual salary statement supports employee IT filing	Not available — no Form 16 PDF, no quarterly 24Q TDS return file	GAP	No statutory income tax return documents for employees or employer.
HRA exemption calculation	HRA as govt allowance component — exemption rules differ from private sector	HRA as configurable salary component; no automatic HRA tax exemption (metro/non-metro, rent declaration)	GAP	No rent declaration, metro flag, or HRA exemption in TDS computation.
Investment declarations (80C, 80D, etc.)	Managed through govt establishment / DDO for TDS	Not available — no employee tax declaration portal	GAP	Employees cannot submit proof of investment for TDS adjustment.
Labour Welfare Fund (LWF)	Applicable per state rules for certain establishments	Statutory component slot exists for LWF (generic); not Karnataka LWF-specific automation	PARTIAL	Can configure manually; no Karnataka LWF rate/period automation.
Gratuity calculation	Part of retirement settlement for eligible govt staff	Not auto-calculated on exit	GAP	No gratuity accrual or payment calculation (15 days salary × years of service).
Bonus (Payment of Bonus Act)	Festival advance / bonus as govt allowance	Can add as salary component; no statutory bonus calculation engine	PARTIAL	No auto 8.33% bonus calculation with eligibility rules.
EPF ECR / compliance filing export	N/A (uses GPF)	EPF Excel/CSV export with UAN, wages, contributions, NCP days	FULL	EPF filing export is a private-sector strength.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
ESI contribution filing export	N/A	ESI Excel export for monthly contribution filing	FULL	ESI export available.

Recommendations

Feature	Recommendation
EPF (Employees Provident Fund) — Private Sector	Core strength for corporate clients.
GPF (General Provident Fund) — Government	Required only for government sector product.
NPS / PRAN (National Pension System)	Add if targeting PSU/government contractors.
GIS (Group Insurance Scheme)	Government sector only.
KGID (Karnataka Govt Insurance Dept)	Karnataka government only.
ESI (Employees State Insurance)	Core strength for eligible establishments.
Professional Tax (PT) — Karnataka Slabs	Implement Karnataka PT slab table (and other state PT masters) with auto-selection by employee work state.
TDS (Tax Deducted at Source / Income Tax)	Priority fix: integrate TDS into payroll calculation using old/new tax regime, declarations (80C, HRA), and generate Form 16 annually.
Form 16 / Form 24Q (Income Tax Returns)	Build Form 16 generator and 24Q export — high value for private sector.
HRA exemption calculation	Part of TDS module — capture rent paid, city type, compute exempt HRA.
Investment declarations (80C, 80D, etc.)	Add tax declaration module in Attendance self-service.
Labour Welfare Fund (LWF)	Add Karnataka LWF rules (employee + employer, annual/half-yearly).
Gratuity calculation	Add gratuity module for Payment of Gratuity Act compliance.
Bonus (Payment of Bonus Act)	Add bonus calculation module if manufacturing clients need it.
EPF ECR / compliance filing export	Keep updated with EPFO ECR format changes.

Module 7: Leave Management

Karnataka government leave types include Earned Leave (EL), Half Pay Leave (HPL), and other special leaves governed by service rules. ISARVA uses configurable leave types with manager/HR approval workflow.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Leave types	EL, HPL, Casual Leave, Maternity, etc. per service rules; balances on ESS	Configurable leave types (LeaveTypeController); synced from Attendance to Payroll API	PARTIAL	Flexible leave types but no govt service-rule templates (EL/HPL accrual formulas).
Leave application workflow	Apply via ESS; approved by reporting officer / DDO	Employee applies → Manager approves → HR approves; notifications and activity log	FULL	Multi-level approval workflow exists.
Leave balance visibility (employee)	Real-time EL, HPL balances on ESS and mobile app	Leave balance fetched from Payroll API; visible in Attendance self-service	FULL	Employee can view balances.
Leave encashment	EL encashment on retirement or as per rules	Not automated — would need manual salary component adjustment	GAP	No leave encashment calculation or payout workflow.
On Other Duty (OOD) / field duty	OOD module in Kartavya-KAAMS for field staff not marking office attendance	GPS visit check-in type exists; no formal OOD approval workflow	PARTIAL	Field visit tracking via GPS but no OOD leave equivalent with approval.
Public holidays	State gazette holidays applied centrally	Public holiday master per financial year; department-wise holiday quota config; flexible/fixed types	FULL	Holiday management is comprehensive.
Compensatory off (comp-off)	Earned against holiday/weekend work per service rules	Comp-off support in leave application flow	FULL	Comp-off available.
Leave reports	Department-wise leave monitoring dashboards	Approved/rejected leaves, LOP, monthly leave chart, daily leave PDF reports	FULL	Good leave reporting for private sector.

Recommendations

Feature	Recommendation
Leave types	Add leave accrual rule engine (monthly/yearly, carry-forward, encashment).
Leave encashment	Add encashment module linked to leave balance and payroll.
On Other Duty (OOD) / field duty	Add OOD/official tour request module.
Leave reports	Add state/district hierarchy reports for large orgs.

Module 8: Attendance Management

Karnataka has deployed Kartavya-KAAMS — an AI-powered mobile attendance system with facial recognition, liveness detection, Aadhaar e-KYC, and 100–150 metre geofencing. It integrates with HRMS and SATS. ISARVA uses biometric Excel upload, TimeStation API, manual punches, and GPS geofencing.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Mobile attendance app	Kartavya-KAAMS Android/iOS app; 3+ lakh registrations; state/district/taluk dashboards	GPS tracking API for mobile check-in/out; no dedicated employee attendance app in app stores	PARTIAL	GPS API exists but no polished public mobile app like KAAMS.
Facial recognition attendance	AI facial recognition with liveness detection to prevent photo spoofing	Not available — biometric via device Excel upload only, not face recognition	GAP	No face-based attendance capture.
Geofencing	100–150 metre radius geofence; GIS-enabled; multiple approved locations (schools, offices, training centres)	Single office geofence (configurable lat/long/radius ~250m); GPS visit mode for field staff	PARTIAL	One office geofence; no multi-location geofence per employee/branch.
Biometric device integration	Integrated with school/office biometric infrastructure via KAAMS	Biometric Excel import (multi-format), TimeStation API fetch, manual punch entry	FULL	Strong admin-side biometric ingestion for private sector.
Shift & duty roster	School/office duty schedules	Shift master + duty roster (per employee per day); bulk week copy/clear	FULL	Shift/roster management is solid.
Monthly attendance processing	Attendance flows to HRMS for salary; SATS integration for schools	Bulk attendance generate → preview → edit → lock → Payroll API consumes locked data	FULL	Lock-before-payroll is a strong control.
Late coming / early going / undertime	Monitored via KAAMS dashboards	AttendancePolicy rules; late/early/OT/undertime calculated in AttendanceService	FULL	Policy-based time deviation tracking exists.
Overtime management	Allowance-based in govt payroll	Dedicated OT module: monthly grid, approve, lock; feeds Payroll OT/incentive module	FULL	OT workflow is well implemented.
Real-time attendance dashboards (hierarchy)	State → District → Taluk → Division monitoring; 90%+ registration tracking	Admin dashboard and GPS tracking map; no govt-style geographic hierarchy	PARTIAL	No multi-level geographic drill-down dashboards.
Employee web punch clock	Mobile app primary; no web punch	No employee web punch; GPS mobile API or admin-processed biometric	PARTIAL	Both rely on mobile/admin — neither has simple web clock-in.

Recommendations

Feature	Recommendation
Mobile attendance app	Launch branded ISARVA Attendance mobile app (Android/iOS).
Facial recognition attendance	Evaluate face recognition SDK for mobile app if fraud is a concern.
Geofencing	Support multiple geofence zones per location/employee.
Biometric device integration	Add real-time biometric device API (not just Excel).
Monthly attendance processing	Highlight as audit-friendly feature.
Real-time attendance dashboards (hierarchy)	Add org-tree attendance dashboard (company → region → branch).
Employee web punch clock	Optional web punch for WFH employees.

Module 9: Loans, Advances & Recoveries

Karnataka HRMS tracks GPF loans, KGID loans, festival advances, and salary recoveries visible on ESS. ISARVA handles salary advances and held salary for private sector.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
GPF loan management	GPF loan apply, approval, EMI deduction, balance on ESS	Not available	GAP	No provident fund loan module.
Salary advance	Festival advance and other govt advances with recovery schedule	EmployeeAdvance module with auto-deduction at payroll finalize	FULL	Salary advance with payroll recovery works.
Loan/advance visibility on ESS	HRMS2 ESS mobile app shows loans, advances, recoveries	Employee can view payslips in Attendance; advance balance not prominently in self-service	PARTIAL	Advance details not fully exposed in employee portal.
Recovery schedule / EMI tracking	Detailed recovery schedule per loan type	Advance with installment deduction; no full amortization schedule UI	PARTIAL	Basic recovery at payroll; no loan statement or EMI calendar.

Recommendations

Feature	Recommendation
GPF loan management	Government sector only.
Loan/advance visibility on ESS	Add 'My Advances' section in Attendance self-service.
Recovery schedule / EMI tracking	Add advance/loan statement for employees.

Module 10: Retirement & Pension

Karnataka HRMS includes retirement management (Kellton scope) and pension slip for retired employees. ISARVA handles employee exit but not pension lifecycle.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Retirement management	Retirement processing, pension commencement, service verification	Exit employee workflow with resignation date; login blocked after exit	PARTIAL	Exit exists; no retirement age trigger, superannuation workflow, or pension initiation.
Pension slip	Pension statement for retired employees on portal	Not available	GAP	No post-retirement pension payment module.
Gratuity / retiral benefits	Calculated as part of govt retirement settlement	Not auto-calculated	GAP	See Tax module — gratuity not implemented.
Leave encashment on retirement	EL encashment processed in final settlement	Not automated	GAP	No retirement leave encashment workflow.

Recommendations

Feature	Recommendation
Retirement management	Add retirement due report and superannuation checklist.
Pension slip	Government sector only.
Gratuity / retiral benefits	Implement for private sector Payment of Gratuity Act.
Leave encashment on retirement	Link leave balance to FFS on exit.

Module 11: Employee Self-Service (ESS)

Karnataka HRMS2 ESS (mobile app + hrmsess.karnataka.gov.in) gives employees direct access to payslips, leave, service book, loans, and transfer documents without going through DDO. ISARVA routes employees to Attendance portal for self-service.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
ESS portal / mobile app	HRMS2 ESS app (Google Play); payslips, leave, loans, service book, transfer docs	Attendance module as self-service portal: leave, payslips, profile, data change request	PARTIAL	Self-service exists but split across Hub + Attendance; no unified ESS mobile app.
Payslip download	Current and past months via ESS	View and download PDF via Attendance / payroll API	FULL	Implemented.
Service book view	Full e-SR on ESS	Not available	GAP	No career history view for employees.
Transfer document access	Transfer orders on ESS	Not available	GAP	No transfer order repository for employees.
Tax declaration submission	Via establishment / integrated in salary processing	Not available	GAP	See TDS gaps.

Recommendations

Feature	Recommendation
ESS portal / mobile app	Package Attendance as 'ISARVA ESS' with unified branding.
Service book view	Add employee timeline (joining, promotions, transfers, trainings).
Transfer document access	Depends on transfer module.
Tax declaration submission	High priority for private sector ESS.

Module 12: Reports, Analytics & Integrations

Karnataka HRMS 2.0 targets 200+ API integrations with 45+ departments and data analytics dashboards. ISARVA integrates Payroll ↔ Attendance via REST APIs and webhooks.

Feature	Karnataka HRMS 2.0	ISARVA HRMS	Status	Gap / Notes
Operational reports	Salary bills, establishment reports, leave statements, attendance summaries	Payroll reports, OT/incentive reports, leave reports, analytical payroll comparison	PARTIAL	Good private-sector reports; no govt establishment/registrar reports.
Data analytics / BI dashboards	Analytical reports with data analytics (Kelton HRMS 2.0 scope)	Dashboard widgets, payroll comparison charts, leave analytics	PARTIAL	Basic analytics; no advanced BI or predictive workforce analytics.
Cross-department API integrations	200+ APIs with 45+ Karnataka departments + central govt	Payroll ↔ Attendance APIs; Hub SSO; CRM/POSH user sync; webhook-based employee sync	PARTIAL	Strong internal integration; no external govt system APIs (treasury, IFMS, etc.).
Audit trail / activity log	Government audit requirements	Spatie Activity Log in Attendance; ActivityLogService in Payroll for payroll actions	FULL	Audit logging present.
Compliance (DPDP / data privacy)	Government data governance	DPDP consent flow, data change request module, POSH compliance (separate app)	FULL	Modern privacy compliance for private sector.

Recommendations

Feature	Recommendation
Operational reports	Add custom report builder for enterprise clients.
Data analytics / BI dashboards	Integrate Metabase/Power BI or build workforce cost dashboard.
Cross-department API integrations	Document public API for third-party integrations.
Compliance (DPDP / data privacy)	Strength for corporate clients.

Priority Roadmap

P1 — Critical for private sector

#	Action Item
1	Wire TDS into monthly payroll calculation (currently settings-only)
2	Implement Karnataka (and multi-state) Professional Tax slab engine
3	Generate Form 16 and annual salary statement for employees
4	Add employee tax declaration module (80C, HRA, regime selection)

P2 — High value enhancements

#	Action Item
1	Launch ISARVA Attendance mobile app (GPS + optional face recognition)
2	Multi-location geofence support for branch-based attendance
3	Gratuity calculation on employee exit
4	Leave encashment automation
5	Employee 'My Advances & Loans' in self-service portal

P3 — Government sector only (if entering that market)

#	Action Item
1	GPF / NPS / GIS / KGID modules
2	Electronic Service Book (e-SR)
3	Cadre management, transfer orders, DDO workflow
4	Recruitment and APR modules
5	Pension management post-retirement

Important Disclaimer

Karnataka HRMS 2.0 is a government system designed for 6+ lakh state employees under government pay rules. ISARVA HRMS is designed for private companies under EPF/ESI/CTC payroll rules. A 'GAP' does not always mean ISARVA is deficient — it often means the feature is government-specific and not needed for corporate clients.
